Off Grid Solar Inverter Wifi Plug Pro

 iOS	 Android
http://itunes.apple.com/cn/app/smartclient-for-solar/id1070155085?l=en&mt=8	https://play.google.com/store/apps/details?id=com.eybond.smartclient

Installation

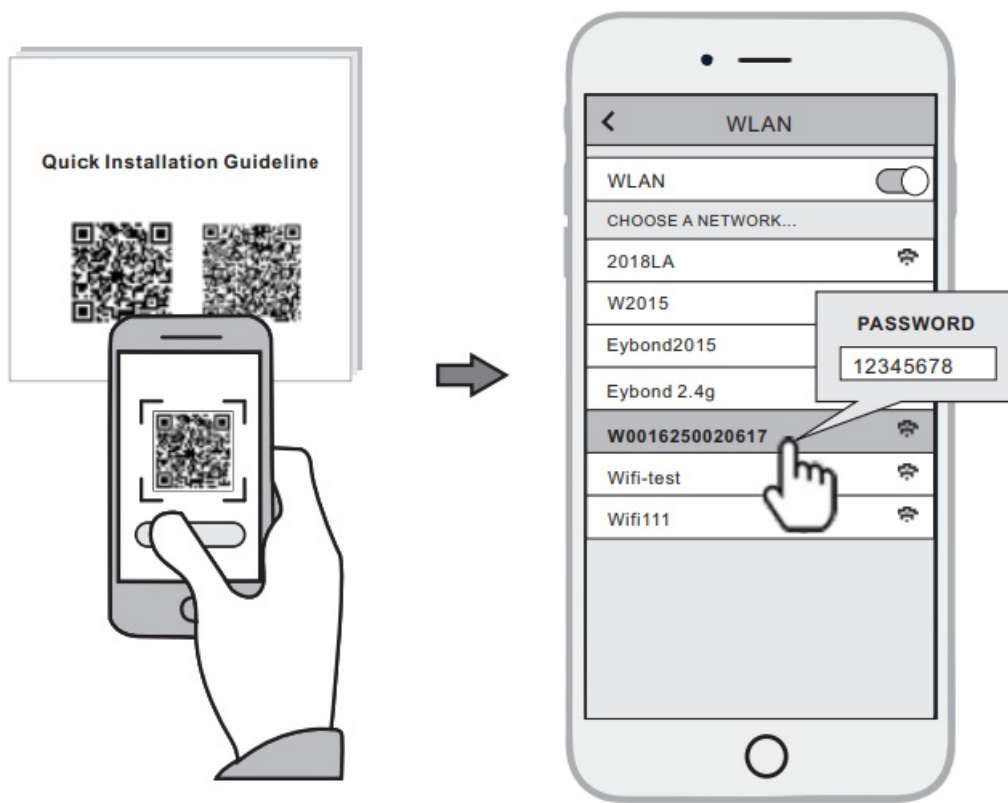

- ① Align the serial port of the Wi-Fi Plug Pro with the inverter and plug it in tightly.
- ② Fasten the Wi-Fi Plug Pro to the inverter with the screw.
- ③ Confirm the status of the LED indicator (After step2.3, when 4 LED indicators keep on, showing the normal working status).

Wireless Router Connection

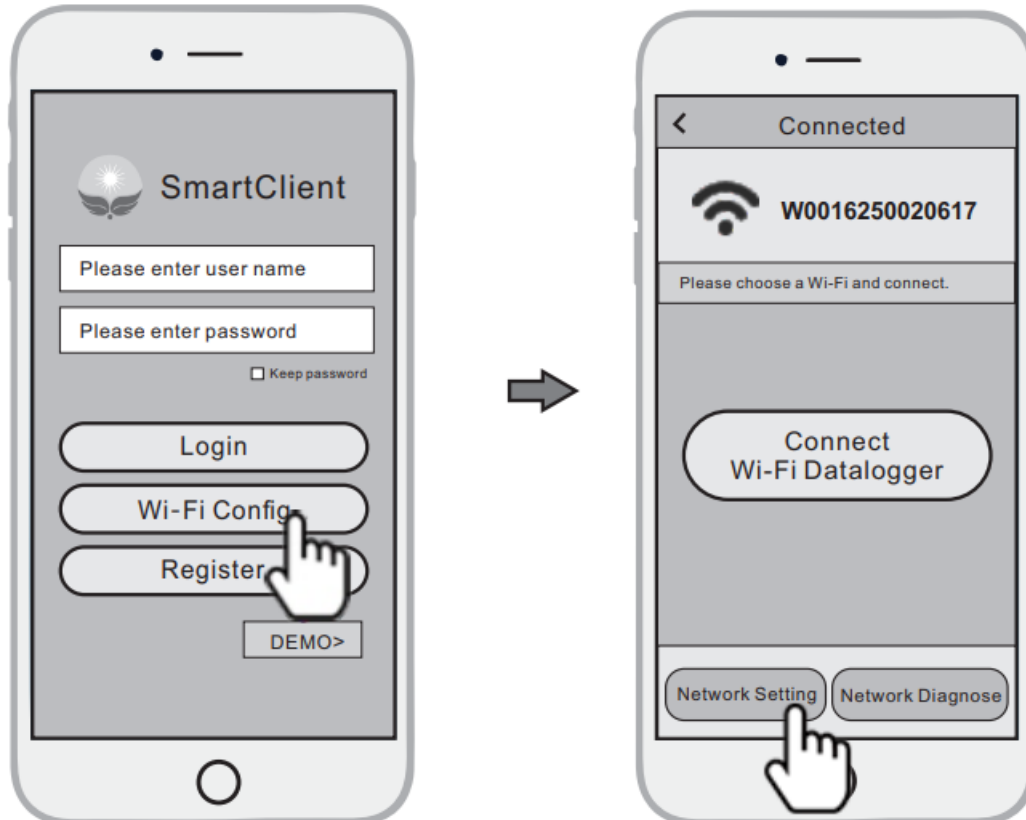

2.1 Download APP and Wi-Fi connection

- ① Scan the QR Code from the cover of this guideline and download the APP.
- ② Select the same number of Wi-Fi Plug Pro PN to connect on your phone WLAN.
(Initial Password:12345678)

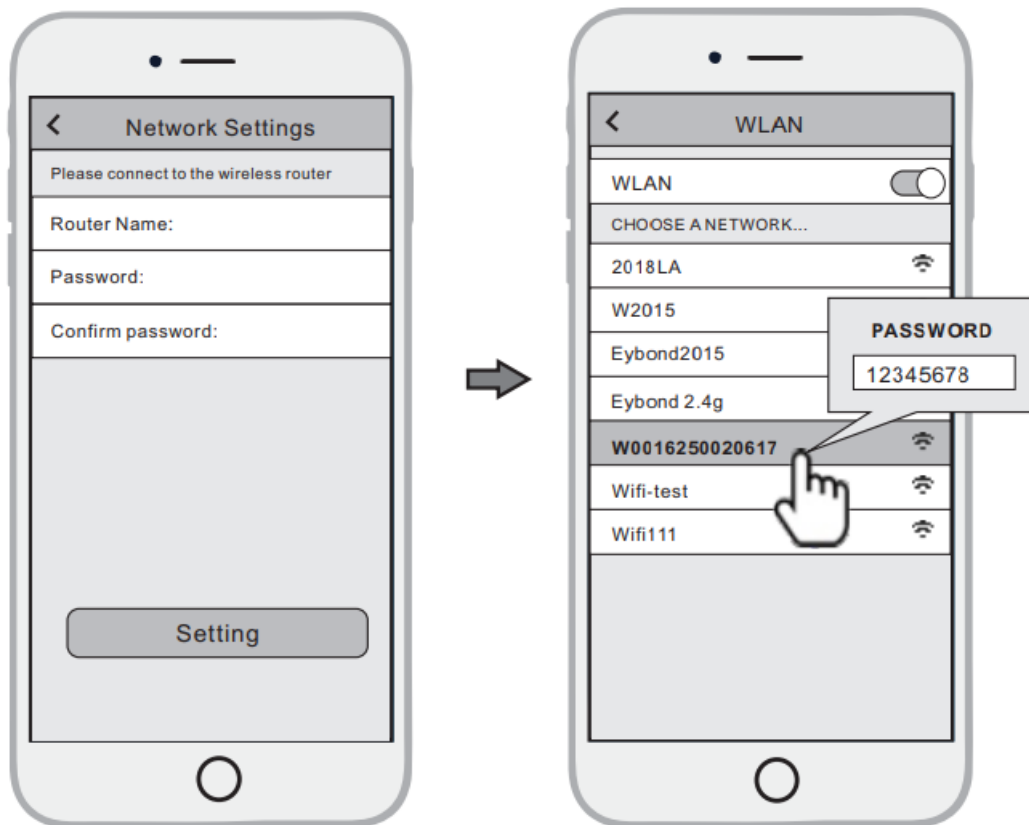

2.2 Wi-Fi Config

- ① Open the APP, Tap the Wi-Fi Config button to enter this page.
- ② Then tap the Network Setting button.

2.3 Network Setting

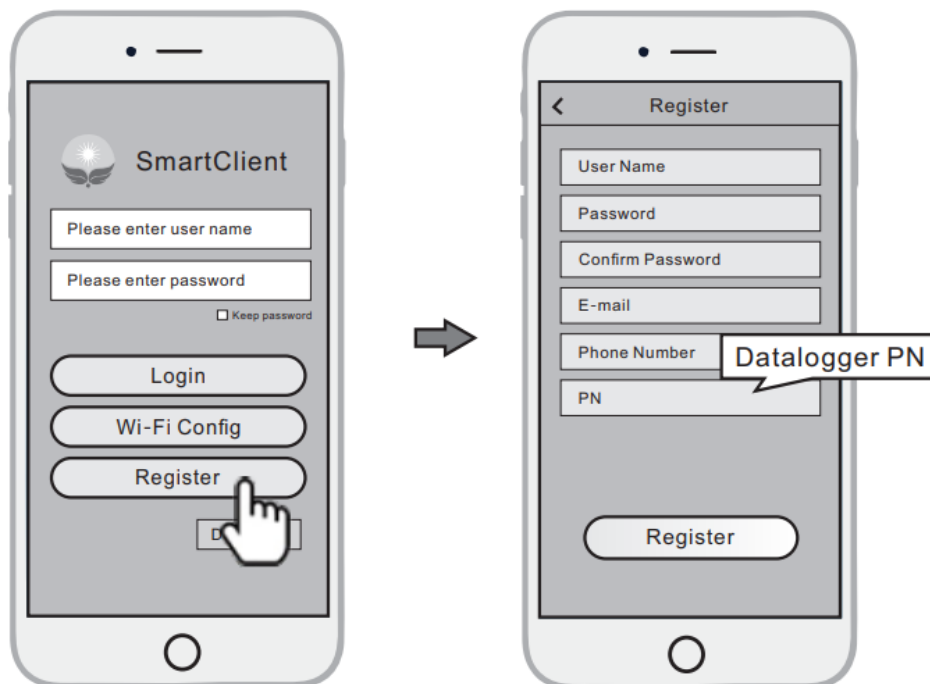

- ① According to the prompts, type in the information to finish the network setting.
- ② After the Wi-Fi Plug Pro is restarted, reconnect the Wi-Fi which connected by step 2.1.

Create Account And Plant

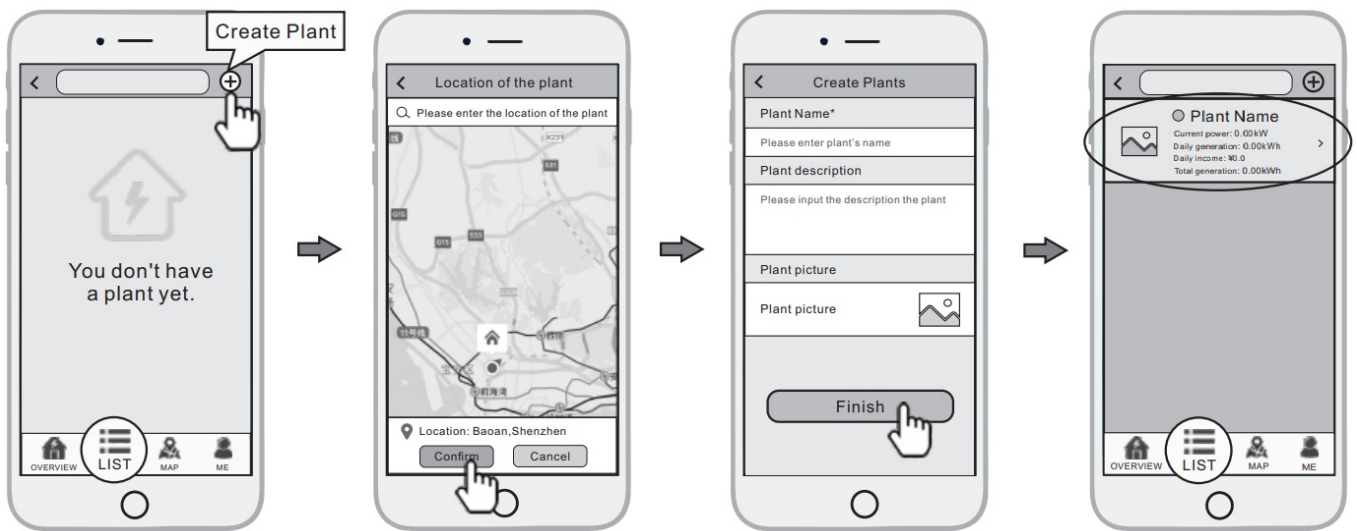

3.1 Create Account

- ① Open the APP, tap the Register button.
- ② According to the prompt information, complete creating an account.

3.2 Create Plant

- ① Login the account and click the list button on the bottom of the home page.
- ② Tap the “ ” button on the top-right corner of the list page.
- ③ According to the prompts, type in the information to finish creating plant.

3.3 Add Multiple Dataloggers

Note: One account can create multiple plants and one plant can add multiple dataloggers. If you only have one datalogger, you can ignore this step.

- ① Tap the new plant you just created, and enter its home page.
- ② Click the Device button on the bottom of the home page.
- ③ Tap the “+” button at the top-right corner to add the datalogger.
- ④ Scan the datalogger PN on the Wi-Fi Plug Pro, or input it manually.

Note: Besides the Smart Client APP, you also can remote monitoring your plants by using WeChat mini program.

Scan the WeChat QR code to use the mini program.
